INFORMATION BULLETIN CAMELBAK RESERVOIR STORAGE

The following advice on proper storage of CamelBak reservoirs should be transmitted to your customers:

CAMELBAK RESERVOIRS MUST BE STORED WITH THE SCREW CAP HAND-TIGHTENED ONTO THE FILL PORT.

STORING THE RESERVOIR WITHOUT THE CAP AND WITH WEIGHT RESTING ON THE EXPOSED FILL PORT MAY RESULT IN DEFORMATION OF THE RESERVOIR FILL PORT.

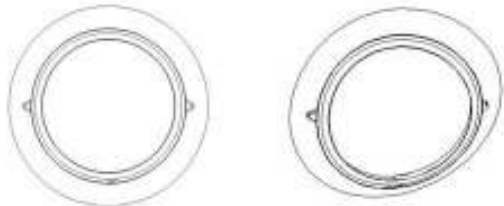

Please note that this bulletin applies to all CamelBak reservoirs sold in carriers or packs as well as reservoir accessories. Examples of the reservoirs and a deformed fill port are shown in Figures 1 and 2, respectively.

Figure 1:

*Examples of CamelBak Reservoirs
(L to R: 100 oz MG Long Neck Replacement Reservoir – SKU 90392, Chemical Biological Reservoir – SKU 60172, 70 oz. Omega Replacement Reservoir – SKU 90721)*

Figure 2:

Normal Fill Port

Deformed Fill Port

While CamelBak cleaning instructions recommend keeping the screw cap off when hang drying the reservoir after cleaning, the screw cap should always be hand tightened in the closed position before storing the reservoir.

If you have further questions regarding this or any CamelBak Maximum Gear products, please check our website at www.camelbak.com or contact us at the email and telephone contact information provided above.
